

There's a buzz in the air.

Can you feel it?

By 2030, the sale of new petrol and diesel vans will be banned, so it's time to start thinking about making the switch to electric alternatives. Arval can make sure you're ready for this exciting next chapter.

We're market leaders in full-service leasing. And through our LCV Centre of Excellence, you'll have all the expertise, insights and telemetric analysis you need through every step of your eLCV transition journey. You'll also have the benefit of our flexible rental contracts, so you can even trial an electric van with more freedom than ever.

"How do I get there?,"

Everyone's eLCV transition journey is different, so we work with our customers to find the best solution for them, focusing on a few key steps.

1 TELL US ABOUT YOURSELF

First things first. Let's sit down, grab a coffee and talk about your current eLCV objectives and strategy.

Do you already have any electric vans? Any particular worries about electrification? Not sure where to begin with charging?

Wherever you are in the process, we're here to help with the next steps.

2 THE RIGHT ROAD FOR YOU

Our expert teams will be on hand to understand your unique needs and the best approach for you.

This could include:

- eLCV transition review
- Vehicle selection
- Whole Life Cost profiling
- Vehicle mileage profiling.

We'll make sure that you have a clear plan for your journey to electrification.

3 DEEPER INSIGHTS

Sometimes we need to dig a little deeper to reach the best solution.

To gain further insights into your eLCV needs, we can offer services such as Telematics analysis (including daily mileage patterns), driver research, overnight storage/charging profiles and journey lengths.

LEADING THE CHARGE

TO 2030

5 FULLY CHARGED

It's not just the van that counts - we can also look at your charging needs to keep your fleet on the road.

This could include assessing your infrastructure requirements, looking at "on the go" charging on your routes, or home charging options for your drivers.

End to end, all aspects of electrification are covered.

4 TEST YOUR METAL

We know this is a big change, so before you make a commitment to new electric vans, we'll offer you the option to try one on a shorter term, flexible contract and at a competitive price.

Put an eLCV through it's paces on a real working day with your drivers, before you take the next step to a longer term lease. We'll help you analyse the trial run, to help us finalise the perfect proposition for you.

As your partner for eLCV transition, you'll find Arval to be the perfect fit!
